# HDLiveCam Distribution network tutorial document

Operation guidev1.7.3

IOS App store Google play : HDlivecam

## **Installation Precautions**

1. Please confirm the power supply voltage before installation. The unmatched power supply may damage the device. Please format the TF card for the first time, otherwise an error may occur.

2. Some router WIFI names and passwords contain Chinese special fonts or special symbols. The device may fail to connect. Please change the WIFI name and password to English letters and numbers.

3. When connecting, please try to make your camera, mobile phone and router close to each other to prevent the signal from being weak.

# **Connection preparation**

After the camera presses the RESET button for 5 seconds, the indicator flashes rapidly and resets until the indicator is always on, indicating that the reset was successful.

Register and login account(support third-party fast login)

### **Connection method: AP direct connection**

The first step In the "Camera" interface, click on the "+" in the upper right corner. Add device

### The second step

Please confirm whether the camera is reset, and click "Next". (If it is not reset, press and hold the RESET button on the device for 5 seconds, the indicator flashes quickly and resets until the indicator is always on)

# The third step

Click "Go to set WIFI"
