MOUNTING

WALL INSTALLATION

Kind tips:
1. Do not pull the cable too hard during installation
2. The cable contains data transmission, please do not fold it

Setp 1:
Put the screws into the device hole

Setp 2:
Take the cable through the door's hole and through the mounting plate, and then tighten the screws

Setp 3:
Plug the cable and buckle into the correct location of LCD machine, and hang to the steel plate .
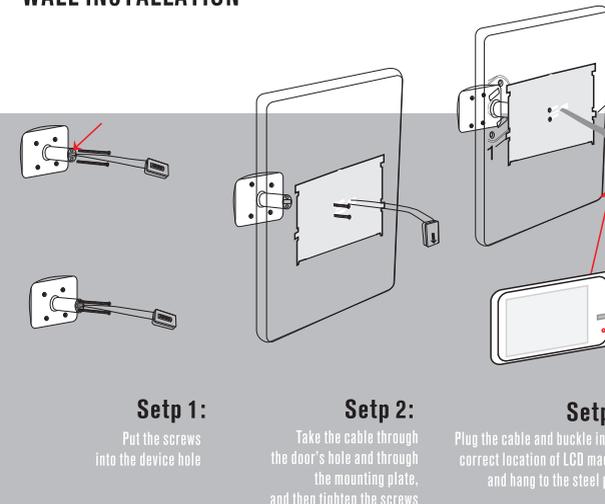

TROUBLE SHOOTING

WONT TURN ON:
Please ensure that the device is properly charged.

DEVICE WONT TURN ON AFTER INITIAL USE:
If you remove the device from the mounting plate while the Tamper Alarm function is turned on, you may disable the device. Simply put it back on the mounting plate and press the doorbell button.
GO to the app settings to turn off the Tamper Alarm.

DEVICE WONT TURN ON AFTER INITIAL USE:
If prompted with "The Connection Failed, Please Check The Wi-Fi Configuration is Correct" when ringing the doorbell after the device has been successfully configured, there may be too many barriers (typically walls) between your Wi-Fi router and the device which has weakened the signal.
