

User Manual – USB Spy Microphone

Step 1 – Power On and Record

Slide the side switch to **ON**.

The indicator light will blink briefly and turn off – recording starts automatically.

To stop recording, slide the switch to **OFF**.

Files are saved automatically.

Warning: Do not connect the device to a computer while recording – this may damage or erase the recording.

Step 2 – Voice-Activated Recording (VOR Mode)

Make sure the device is turned off.

Slide the switch to **ON** and keep it on for 10 seconds without speaking.

When the device detects sound above 45 dB, it will start recording automatically.

When the sound stops, the recording will end and be saved.

To exit VOR mode: Turn the device off.

Step 3 – Recording While Charging

Turn off the device and connect it to a computer or charger.

When the red light flashes (or the blue light stays solid), slide the switch to **ON**.

When the indicator blinks again, recording starts automatically.

To stop and save the file: Slide the switch to **OFF**.

Step 4 – Playback

A) Playback via Computer

Connect the device to a USB port.

Open the **Recordings** or **File** folder and play the .WAV files.

If the file does not play with the standard Windows Media Player:

Right-click → **Open with** → **Windows Media Player Legacy** or **VLC**.
